Career Profile

Cloud engineer with a strong interest in security, automation, and building infrastructure the right way from the start. Worked with AWS, Terraform, and Kubernetes to automate deployments, improve compliance, and reduce manual effort. Comfortable working across development and operations, learning new technologies, and contributing to teams that value clarity, collaboration, and well-designed systems.

Education

Master of IT Professional (Deakin University) Australia

Feb 2024 – Oct 2025

- Specialization in Cloud Technologies

Technical Experience and Projects

Junior Systems Engineer (Cloud & DevOps) – EPAM Systems

Dec 2021 - May 2023

- Provisioned and maintained AWS infrastructure across IAM, EC2, S3, networking and monitoring services, supporting secure and scalable environments
- Automated deployment of Amazon Connect, contact flows and Amazon Lex bots using Terraform and CI/CD pipelines, reducing manual configuration effort and deployment errors
- Collaborated in a DevOps team to provision and manage Kubernetes clusters using Infrastructure as Code and shell scripting, including automated upgrade processes
- Improved infrastructure consistency by implementing reusable Terraform modules and version-controlled deployments

Award: Pat on Badge Award – Recognised as a top-performing entry-level employee during initial months

Policy Deployment Engine Capstone Project – Deakin University

Feb 2025 – Oct 2025

- Designed and implemented cloud security policies for GCP using Rego to improve infrastructure compliance
- Researched and applied secure cloud configuration standards, focusing on encryption, identity access control and data residency
- Developed Infrastructure as Code templates to enforce policy-driven deployments
- Produced structured documentation translating technical controls into clear guidance for both technical and non-technical stakeholders

Other Work Experience

Event Staff – Spark Event Group – Melbourne VIC

Nov 2024 – Present

- Supported operations at large-scale graduation ceremonies, AFL matches, Australian Open and F1 Grand Prix assisting with guest services and event logistics
- Managed ticket scanning, ushering, bartending and patron enquiries, maintaining efficient queue flow and clear communication in high-volume environments

Technical Skills

- **Cloud Platforms:** AWS (IAM, EC2, S3, Route 53, Lambda, Lex, CloudWatch, Networking, Load Balancing), GCP, Azure
- **Infrastructure as Code:** Terraform
- **Containerisation & DevOps:** Kubernetes, Docker, Jenkins, Ansible, Git, CI/CD Pipelines
- **Programming:** Python (boto3), Rego
- **Scripting:** Bash
- **Operating Systems:** Linux, Windows

Professional Certifications

- Hashicorp Certified: Terraform Associate Certification ([Link](#))
- AWS Certified Solution Architect Associate AWS (SAA-C03) ([Link](#))

Volunteering

MLAI – Event Volunteer (Melbourne, Australia)

- Supported hackathons and tech events through event coordination, attendee check-in and participant assistance

Run for the Kids Marathon – Drink station volunteer (Melbourne, Australia)

- Facilitated race participants by managing water stations, offering encouragement, and ensuring efficient operations

City of Melbourne – Event Volunteer (Melbourne, Australia)

- Delivered customer service support at information booths during large-scale public events

Deakin University Student Association (DUSA) - Crew Member (Melbourne, Australia)

- Contributed to organizing student events like orientations and food pantries, implementing smooth event operations and a welcoming environment for attendees

Hobbies and Interests

- Playing sports and games – Represented Deakin Uni Team for Lacrosse and Pickleball
